*Coloring your world!*

## **High-End 3D Cinema Glasses**

***Spectrum's S3D-1000 is here!***

*"The new age in 3D is now and with Spectrum  
you'll have a trustworthy partner for a life time.*

*We'll guarantee you won't even think of looking anywhere else."*

***Spectrum 3D: Coloring your world!***

 **SPECTRUM**

After months of preparation and awaiting the decision between Master Image and RealD which has changed the 3D Cinema sector as we know it, Spectrum 3D has fully launched and established itself in the 3D Cinema sector!

After being contracted by Master Image 3D for over 8 years as number one manufacturer for their 3D glasses lines, Spectrum 3D will now continue independently with our new and improved model: the "S3D-1000". With the intention of getting our own high-end 3D System out on the market the coming years.

Over the years we have built an impressive track record and have always maintained our high levels in service, quality and supply chain giving MI's customers no reason to look anywhere else.

Now we hope to give cinema exhibitors around the world the same quality assurance and level of expertise they are used to and deserve. We hope we can start soon and build on a long-lasting partnership where we'll help each other thrive!

***Spectrum: Coloring your world!***

## Spectrum 3D S3D-1000, the best passive 3D glass on the market

- Using the best quality 3D lens film manufactured in South Korea by partner with over 20 years' experience
- Very comfortable and trendy design and lightest passive 3D glass on the market. Competitively priced
- Fully universal. Compatible with all major 3D system suppliers; RealD, Master Image, Dolby, Volfoni, X-Mirror.
- Re-usable S3D-1000 model available and premium 3D film is possible for cinemas with even higher light efficiency needs

### 3D Lens Features

#### Improved lens size for ease of the cinema viewer

25% bigger to minimize light coming in from the side and optimizing 3D experience.

#### Less crossing and annoyance for the viewer's eyes

Minimizing the chances on 3D fatigue and headaches for viewers making longer running 3D movies more comfortable.

#### Best light efficiency on the market at competitive price

39-40% light efficiency, 4% more than the other suppliers that have been tested. Premium available to push LE by 3% with the S3D-1000 you will get the most out of your 3D Cinema System

### S3D-1000 Design

#### Extremely light and comfortable design

The best 3D glass is the one you don't even feel like you're wearing one during a 3D movie. The S3D-1000 is currently the lightest glass on the market.

#### Solid frame connection with streamlined legs & nose setting

No friction with leg placement on the ears and temple. Minimized nose setting for optimum comfort for lengthy 3D movies and leaving no marks.

#### Trendy design and fully customizable

Inspired by one of Ray-Ban's most popular and famous models: the Way-Fahrer. Any color combination is possible including your own company or cinema's logo on the side!
